

Introducing Airdog X-Series

for Homes, Businesses and Facilities

Airdog X3

SKU - AIRDX3

Applicable Area - 215 ft²

CADR (Particle) - 120 CFM

CADR (Formaldehyde) - N/A

Ozone - <10 PPB

Unit Size - 20 x 10 x 10 inches

Unit Weight - 13 lbs.

Airdog X5

SKU - AIRDX5

Applicable Area - 400 ft²

CADR (Particle) - 185 CFM

CADR (Formaldehyde) - 90 CFM

Ozone - <10 PPB

Unit Size - 26 x 12 x 12 inches

Unit Weight - 24 lbs.

Airdog X8

SKU - AIRDX8

Applicable Area - 1000 ft²

CADR (Particle) - 500 CFM

CADR (Formaldehyde) - 190 CFM

Ozone - <10 PPB

Unit Size - 30 x 15 x 15 inches

Unit Weight - 43 lbs.

BREATHE DIFFERENT

Destroy Viruses, Reduce Allergens and Remove Odors with Patented TPA Technology and Innovative Waste-Free Filter Design.

LAB TESTS CONFIRMED:

Airdog Technology Destroys COVID-19

Airdog puts your health and the health of your indoor environment first. Following a thorough clinical test, product testers were impressed with Airdog's breakthrough capabilities in removing airborne pathogens - including Influenza and COVID-19.

DID YOU KNOW?

In addition to hand washing and social distancing, the EPA recommends increasing indoor ventilation and air purification as important components in controlling the spread of COVID-19 throughout indoor spaces.

TRUSTED TECHNOLOGY

Loved by Customers Worldwide

As it has become known that viruses such as COVID-19 spread more effectively indoors, many have turned to indoor air purification as an added means of protection, and more specifically have chosen the patented power of Airdog as the ultimate solution to their indoor air quality concerns.

Backed by many patents, lab certifications and international recognition, Airdog's advanced technology is the choice of top institutions such as Texas A&M University, and is trusted by many homes, businesses, schools and other facilities to create cleaner and healthier indoor air.

"It's a great addition to our home and gives us greater piece of mind."

- Verified Customer, Donna D.

Airdog X8

WASTE FREE

and Reusable Filter

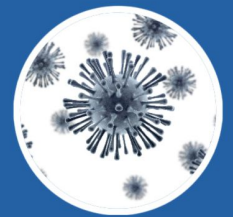

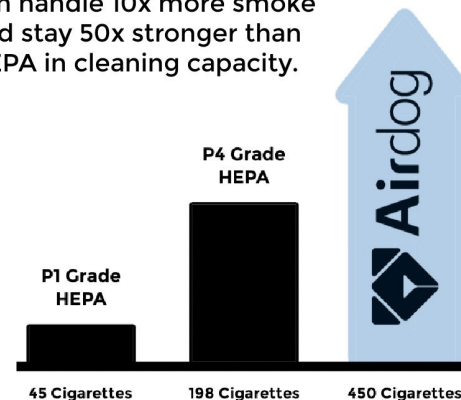

HEPA filters need to be replaced repeatedly which can easily cost hundreds of dollars per year. Airdog uses non-consumable collecting plates, which you simply wash by hand and reuse, rather than having to continuously rely on expensive replacement filters.

OUTPERFORMS

and Outlasts Competitors

CCM (Cumulative Cleaning Mass) is the measurement that indicates the continuous air-cleaning power of a purifier. For a typical HEPA air purifier, lab researchers have quantified that the smoke equal to 45 cigarettes would yield failure. To add some perspective, after about 10 more cigarettes, Airdog's cleaning capacity only drops -0.2%. That means Airdog can handle 10x more smoke and stay 50x stronger than HEPA in cleaning capacity.

DESTROYS VIRUSES

Removes Influenza, COVID-19 and other biological contaminants.

RECORD BREAKING

Destroys particles down to 14.6 nanometers in size - 20x smaller an average!

SUPERIOR DESIGN

Unique layered filtration design not only collects but destroys pollutants.

WHISPER QUIET

Operates nearly 6x quieter than other purifiers.
